Education

University of Utah — Salt Lake City, UT
Bachelor of Science in Computer Science — Expected Graduation: May, 2027

- 3x Deans List

Experience

SWE Intern | *Python* — May 2025 - August 2025
Microsoft — Redmond, WA

- Developed an AI agent leveraging retrieval-augmented generation (RAG) with data stored in Azure Cosmos DB to surface relevant documentation, reducing engineer time-to-resolution for on-call incidents.
- Architected and deployed an AI-assisted document processing platform in Azure, enabling scalable ingestion, transformation, and semantic enrichment of unstructured data.
- Processed and enriched thousands of team documents, applying advanced data manipulation techniques to improve AI accuracy, search relevance, and usability.
- Drove operational efficiency by streamlining knowledge access and document workflows, reducing incident resolution time, and freeing engineers for higher-value initiatives.

Microsoft Explore Intern | *JavaScript* — May 2024 - August 2024
Microsoft — Redmond, WA

- Developed an internal web application using ReactJS, HTML, CSS, and JavaScript to streamline onboarding processes for internal Microsoft organizations.
- Reduced onboarding time and complexity through creating an intuitive and informative website.
- Implemented user-focused state management using MobX across the website to improve user experience.
- Successfully collaborated with diverse teams and organizations to ensure the product met all requirements and exceeded expectations.

IT — January 2021 – August 2023
Granite Peak Equity — Bozeman, MT

- Collaborated with employees to understand and resolve issues with their workstations quickly.
- Diagnosed and repaired workstations experiencing software errors with Windows 10 and 11.
- Recommended and implemented workstation improvements that boosted performance by more than 50%, enhancing employee productivity.
- Implemented enterprise cloud storage and remote control solutions.

Projects

Workout and Calorie Tracking App | *Flutter* — October 2025 - Present

- Developing a full-stack fitness app enabling calorie tracking, workout logging, and nutrition history visualization.
- Designed and built Flutter front-end with live data sync and cross-platform support.
- Enhanced user engagement through AI-powered recommendations and a social sharing feature connecting users within the app.
- Built and maintained secure, high-performance databases to manage user profiles, workout logs, and nutrition data

Personal Website — September 2023

- Developed a professional and user-friendly website using Jekyll.
- Required understanding of HTML, CSS, and JavaScript in order to debug code errors.
- Utilized Git in website development to ensure efficient version control.
- Wired my GitHub pages to my custom domain using DNS registration.

Technical Skills

Familiar Languages: Java, Python, JavaScript, C#, C++, Flutter
Developer Tools: MobX, Git, CSS, ReactJS, HTML, NodeJS, Azure
Cloud Platforms: Azure
Soft Skills: Communication, Teamwork, Problem-Solving, Adaptability, Determination, Organization, Discipline
